

## Evo 6EH

The Evo6EH is a mid-high loudspeaker enclosure offering high output and controlled directivity. It is most frequently used as the high power mid-high section of a multi-way PA system (for example with F215s and F221s/BR221s) or as stage infills for larger systems.

### Features:

- Fully horn loaded for high efficiency
- Two-way (passive version available)
- Funktion-One designed drivers
- Low weight Neodymium magnets throughout
- Fitted with M10 flying points
- Optional wheelboard
- Optional foam-backed steel grill
- Evo6SH skeletal version available
- Evo7EH available with narrower dispersion & higher intensity

Driver	Operating Band*	Sensitivity (1W at 1m)	Power (rms**)	Nominal Impedance
10"	200 - 4kHz	108dB	250W	16 32Ω
1.4"	4kHz - up	109dB	75W	Ω
