

KELCO INSTALL FUNKTION ONE AT OLIVER'S

Kelco UK LTD has demonstrated the flexibility of Funktion One's range of loudspeakers with an install at Oliver's late bar and restaurant in Tamworth. Owner David Oliver required a system with enough support to deliver clarity and intelligibility at lower sound levels appropriate to the dining area. The Funktion One kit proved to be equal to the task at an auditioning session, and after consultation with Tony and Ann Andrews at the Funktion One headquarters, Oliver was convinced. "We were invited amongst many other installers to provide an on-site demonstration of suitable

equipment for the venue," says Kelco MD Dave Kelland. "We took Dave (Oliver) to Funktion one, where he arrived at his perfect sound."

For the main bar, Funktion One Res-1 and Minibass speakers have been used, powered by MC² amplifiers and managed with the Funktion One X0-1 loudspeaker management unit. In the dining area, two Funktion One F-88 soeakers are underpinned with a corner minibass and are similarly powered by MC². The audio is organised by Formula Sound's mixer units.
