

## SB8

The SB8 is an extremely compact, yet powerful and convincing bass loudspeaker.

Perfect for applications where a conventionally-sized subwoofer is too large and obtrusive, such as bars, restaurants, retail outlets and galleries. The small size and high output of the SB8 also makes it suitable for consumer applications, such as a dynamic and precise low frequency channel in a home theatre system, or as bass extension for the F5, F55 or F81 in a 2.1 listening or monitoring system.

### Features:

- Bespoke high sensitivity 8" bass driver
- Powerful and convincing bass in a very small package
- Dynamic and musical
- No EQ or controller required - only crossover filters
- Self powered version with satellite outputs coming soon

Driver	Operating Band	Sensitivity (1W at 1m)	Power (AES)	Nominal Impedance
